

Games 2008

Third Congress of the Game Theory Society

July 13-17, 2008

Center for Game Theory and Economic Behavior

Kellogg School of Management

Northwestern University

Evanston, Illinois, USA

Conference Program

Please note the following edits to the printed program:

Sunday 8:30 AM – 9:50 AM

G40: Bounded Rationality I

Plans as Conditional Strategies: A New Concept Enabling Cooperation in the Prisoners' Dilemma

Presented by: Alexander Dilger, University of Muenster

Strategic Complexity in Repeated Extensive Games

Presented by: Nozomu Muto, Hitotsubashi University

Skill in Poker

Presented by: Ruud Hendrickx, Tilburg University

Sunday 11:00 AM – 12:25 PM

G40 – Learning, Communication, Coordination:

Communication with Unobservable Constraints

Presented by: Ilya Khayutin, Hebrew University

Strategic Information Transmission through the Media

Presented by: Hanjoon Jung, Lahore University of Management Sciences

Social Learning in Two-Armed Bandit Problems

Presented by: Braz Camargo, University of Western Ontario

1246 – Algorithms and Games:

Game-theory-based approaches to full-scale Heads-Up Texas Hold'em poker: Automated abstraction and scalable equilibrium-finding algorithms

Presented by: Tuomas Sandholm, Carnegie Mellon University

Knowledge and Structure in Social Algorithms

Presented by: Rohit Parikh, City University of New York

Congestion, Coordination and Matching

Presented by: Hannu Salonen, University of Turku

Monday 8:30 AM – 10:15 AM

G03 – Auctions

Asymmetric First-Price Auctions With Uniform Distributions: Analytic Solutions to the General Case

Presented by: **Todd R. Kaplan**

101 – Repeated Games

Repeated Anonymous Random Matching Games: Community Enforcement Beyond the Prisoner's Dilemma

Presented by: **Julio Gonzalez-Diaz**

Monday 3:15 PM – 5:00 PM

1246 – Theoretical Industrial Organization

Strategic Capacity Choice under Uncertainty: The Impact of Market Structure on Investment and Welfare

Presented by: **Veronika Grimm**

On Compatibility in Two-sided Market

Presented by: **Ekaterina Goldfayn**

G43 – Dynamic and Stochastic Games II

Solving Dynamic Games with Newton's Method

Presented by: **Karl Schmedders**

101 – Repeated Game Experiments

Cooperation in Infinitely Repeated Games: Extending Theory and Experimental Evidence

Presented by: **Giancarlo Spagnolo**

Reward Beats Punishment: Indirect reciprocity and the role of second order information

Presented by: **Arno Riedl**

Tuesday 8:30 AM – 10:15 AM

1246 – Values of Cooperative Games

NEW ENTRY Multilinear Extensions and Semivalues for Multichoice Games**

Presented by: Michael Jones

Tuesday 3:00 PM – 4:45 PM

2245 – Theory I

Renegotiation-proof Agreements under Asymmetric Information

Presented by: Arijit Sen

G03 – Auctions IV

Aversion to Price Risk and the Afternoon Effect

Presented by: Claudio Mezzetti

Wednesday 8:30 AM – 10:15 AM

101 – Endogenous Participation

Investigating Bid Preferences at Low-Price, Sealed-Bid Auctions with Endogenous Participation

Presented by: **Harry Paarsch**

G40 – Behavioral Theory II

MOVEDThe Strategic Value of Recall**

presented by: Ron Peretz

Wednesday 3:30 PM – 4:45 PM

160 – Evolution and Learning

~~Deleted**An Introduction to Games of Infection – Flavio Toxvaerd~~

640 – Behavioral Models of Intertemporal Choice

~~Deleted**Willpower and the Optimal Control of Visceral Urges – Dan Silverman~~

G43 – Communications and Games

Credibility and Determinism in a Game of Persuasion

Presented by: **Itai Sher**

Thursday 12:00 PM – 1:20 PM

G45 – Incomplete Information

The Dynamics of the Bayes-Nash Equilibrium

Presented by: **Larissa Batrancea**

G03 – Imperfect Monitoring

Communication Games with Asymmetric Information

Presented by: Alon Shapira

Acknowledgements

A number of people have played an important role in helping to get the 3rd World Congress off the ground. Dean Emeritus Don Jacobs and Professor Ehud Kalai have been instrumental in securing funds for hosting the congress. The Kellogg School in the person of Carole Cahill, Associate Dean for Facilities and Human Resources, has been particularly helpful with the scheduling of rooms and the provision of support staff.

Kellogg Information Systems (KIS) in the person of Adan Cruz, has been generous with time, resources and initiative. The team that feeds the Kellogg School (led by Ron Griffin and Todd Eisenbarth) recognizes that a gathering of scholars, like an army, marches on its stomach.

Our volunteers: Kris Peters, Toan Phan, Aygun Dalkiran, Min Chen, Kane Sweeney, Alvaro Parra, Bach Ha, Yalin Sagduyu, Hang Zhou, Xue Feng, Hingxia Shen, Jeanne Sheppard, Fran Walker and Michael Brunken have played an important role in the logistics of the congress.

Finally and most importantly, Michael Sara and Rita Ryan-Novak of the MEDS department. Michael provided invaluable tech support while Rita wheeled and dealt with the many vendors and friends of Kellogg that support this affair and kept track of many (many!) small but important details.

Table of Contents

Miscellaneous Information	3
Conference Schedule	4
Semi-Plenary Speakers	5-6
Regular Sessions July 13th	7-9
Regular Sessions July 14th	10-11
Regular Sessions July 15th	12-13
Regular Sessions July 16th	14-15
Regular Sessions July 17th	16-17
Poster Sessions	18-19
Maps	20-22
Evanston Restaurants	23-24
Sponsors (cont'd)	25

Miscellaneous Information

Please wear your badge at all times in Jacobs and Norris. You will need the badge to get lunch and into dinner.

Regular Sessions take place in the Jacobs center. The last speaker in the session is the session chair. It is very important that you ensure the session starts and ends at the correct time. In case of a last minute cancellation, do not fill the gap as this will facilitate session hopping. *Each speaker has 25 minutes to set up, speak and take down.*

Semi-Plenary Sessions take place in Norris and Jacobs. The last speaker in the session is the session chair. It is very important that you ensure the session starts and ends at the correct time. *Each speaker has 45 minutes to set up, speak and take down.*

Plenary Sessions take place in Coon forum, located in the Jacobs center. The room seats 650 and there will be 3 volunteers with microphones in the audience to catch questions.

Poster Sessions take place in Jacobs room 102 (near registration) on Tuesday and Wednesday. Presenters in these sessions should be there 10 minutes before the start to set up their displays.

If you don't wish to take your boxed lunch outside, there is seating in the Atrium and Coon forum. Your help in placing rubbish in the appropriate place is **greatly appreciated**.

Information about the program and (we hope not) last minute changes will be displayed on the monitor in the Atrium as well as in the lounge in room 102.

If you need a place to keep a bag or two contact the registration desk.

If you would like to connect wirelessly to the internet, go to the registration desk to pick up a wireless ID and password.

Bus times to the Skokie hotels are posted near the registration desk.

Overview of Schedule

Saturday July 12
 5:30-7:00 WELCOME RECEPTION and EARLY REGISTRATION:
 5.30 to 7 p.m. in the Atrium of the Jacobs Center

Sunday July 13
 7:30-4:30 *Registration*
 8:30-9:50 Regular Sessions
 9:50:10:50 Welcome & coffee break. Welcome remarks by Dean Jacobs, Dean Jain and Ehud Kalai in Coon Forum begin at 10:05 a.m.

11:00-12:25 Regular Sessions

12:30-1:40 Lunch

1:40-3:10 Semi-plenary Sessions

3:25 – 5:10 Regular Sessions

5:10-5:30 Coffee break

5:30 - 6:30 **Presidential Address: H. Peyton Young**
 Chaired by Paul Milgrom

Monday July 14
 7:30-4:30 *Registration*
 8:30-10:15 Regular Sessions

10:15-10:45 Coffee break

10:45-12:15 Semi-plenary Sessions

12:30-1:30 Lunch

1:30-2:45 Nobel Panel: Robert Aumann, Eric Maskin, Roger Myerson, Thomas Schelling
 Introductions, Henry Bienen, President, Northwestern University
 Moderated by Ehud Kalai

2:45-3:15 Coffee break

3:15 - 5:00 Regular Sessions

5:00-5:30 Coffee break

5:30 - 6:30 **Address of the President Elect: Sergiu Hart**
 Chaired by Shmuel Zamir

7:30-9:30 Conference dinner, Deering Meadow

Tuesday July 15
 8:00-12:00 *Registration*
 8:30-10:15 Regular Sessions

10:15-10:45 coffee break

10:45-12:15 Semi-plenary Sessions

12:30-1:45 **BBQ Lunch**

12:45-1:45 Meeting of the Council in Room 561

1:45-3:00 Poster Session

3:00-4:45 Regular Sessions

4:45-5:15 Coffee break

5:15-6:15 **Morgenstern Lecture: Jean Tirole**
 Chaired by Drew Fudenberg

Wednesday July 16

8:30-12:00 *Registration*

8:30-10:15 Regular Sessions

10:15-10:45 Coffee break

10:45-12:15 Semi-plenary Sessions

12:30-12:50 Pick up lunch

12:50-1:35 Yoram Baumann, Stand-up Economist

1:45-3:00 Poster Session

3:00-4:45 Regular Sessions

4:45-5:15 Coffee break

5:15-6:15 **von Neumann Lecture: Abraham Neyman**
 Chaired by George Mailath

Thursday July 17

8:30-10:15 Regular Sessions

10:15-10:45 Coffee break

10:45-11:45 **Shapley Lecture: Tim Roughgarden**
 Chaired by Éva Tardos

12:00-1:20 Regular Sessions

END

Semi-Plenary

Sunday 1:40 PM - 3:10 PM

Location: **Jacobs 1246**

Auctions with Budget Limits

Presented by: Noam Nisan, The Hebrew University

Game Theory and Computer Science Prize lecture: The Complexity of Computing a Nash Equilibrium

Presented by: Constantinos Daskalakis, Berkeley

Location: **Norris 202**

Ambiguity and Rationality

Presented by: David Schmeidler, Tel Aviv University and the Ohio State University

Belief Free Games on Incomplete Information

Presented by: Dirk Bergemann, Yale University

Location: **Norris 101**

Why do Sellers (Usually) Prefer Auctions?

Presented by: Paul Klemperer, Nuffield College

Manipulative Auction Design

Presented by: Philippe Jehiel, PSE

Location: **Jacobs G40**

Altruistic Kidney Exchange

Presented by: Tayfun Sonmez

One Chance in a Million: Altruism and the Bone Marrow Registry

Presented by: Ted Bergstrom, University of California at Santa Barbara

Location: **Norris McCormick**

Dynamics and Stability of Constitutions, Coalitions and Clubs

Presented by: Daron Acemoglu, Massachusetts Institute of Technology

Models of Values Conflict

Presented by: Timothy Feddersen, Northwestern University

Monday 10:45 AM - 12:15 PM

Location: **Norris 202**

Trust, Social Capital and Economic Growth

Presented by: Lawrence Blume, Cornell University

Matching through Decentralized Markets

Presented by: Leeat Yariv, California Institute of Technology

Location: **Norris McCormick**

Rational Decisions in Large Worlds

Presented by: Kenneth Binmore, University College London

Work on a Project to Study Three-Person Cooperative Games Using the 'Agencies Method' in a Variation Employing Attorney-Agents of an Automatic (or Robotic) Type

Presented by: John Nash, Nobel Laureate

Location: **Norris 101**

Modeling Behavior in Novel Strategic Situations via Level-k Thinking

Presented by: Vincent Crawford, University of California, San Diego

Limited Rationality and Strategic Interaction

Presented by: Jean-Robert Tyran, University of Copenhagen

Location: **Jacobs G40**

Interactive Epistemology and Solution Concepts for Incomplete Information Games

Presented by: Pierpaolo Battigalli, Bocconi University

Strategic Information Sharing in Repeated Games

Presented by: Nicolas Vieille, HEC School of Management

Semi-Plenary

Tuesday 10:45 AM - 12:15 PM

Location: **Norris 202**

Chicken in Prison: Weakly Belief-Free Equilibria in Repeated Games with Private Monitoring

Presented by: Michihiro Kandori, University of Tokyo

Information and Repeated Games

Presented by: Larry Samuelson, Yale University

Location: **Norris 101**

Identification of Demand in Empirical Models of Differentiated Products Oligopoly

Presented by: Philip Haile, Yale University

Professionals and students: mixed-strategy play in the lab and in the field

Presented by: John Wooders, University of Arizona

Location: **Jacobs G40**

Games with Externalities

Presented by: Bhaskar Dutta, University of Warwick

Positive Externalities and Negative Externalities in Services

Presented by: Ramesh Johari, Stanford University

Location: **Norris McCormick**

On Searching and Diffusing Opinions

Presented by: Gabrielle Demange, EHESS

Trading Networks

Presented by: David Easley, Cornell University

Wednesday 10:45 AM - 12:15 PM

Location: **Norris McCormick**

Decision Theoretic Models of Uncertain Temptations

Presented by: Eddie Dekel, Northwestern University

On the Possibility of Learning in Bayesian Games

Presented by: Ehud Kalai, Northwestern University

Location: **Norris 101**

The Price of Anarchy, Stability, and Learning in some Congestion Games

Presented by: Éva Tardos, Cornell University

Dynamic Mechanisms for Distributed Coordination: Models and Methods

Presented by: David Parkes, Harvard University

Location: **Jacobs G40**

Evolutionary Game Dynamics and Stability of Nash Equilibria

Presented by: Josef Hofbauer, Universität Wien

Robust Set-Valued Predictions in Games

Presented by: Jorgen Weibull, Stockholm School of Economics

Location: **Norris 202**

A Characterization of Revenue Equivalence

Presented by: Rakesh Vohra, Northwestern University

Stable Sets Redux

Presented by: Lloyd Shapley, UCLA

BEHAVIORAL THEORY I - G45

Dynamic Psychological Games

presented by: Martin Dufwenberg

Doubts and Equilibria

presented by: Jose Uriarte

The Ultimate Game: Interdependent Preferences in Experimental Setting

presented by: Jorem Halevy

BOUNDED RATIONALITY I - G40

Plans as Conditional Strategies: A New Concept Enabling Cooperation in the Prisoners' Dilemma

presented by: Alexander Dilger

Strategic Complexity in Repeated Extensive Games

presented by: Nozomu Muto

Skill in Poker

presented by: Ruud Hendrickx

UPDATING - G27

Updating Towards the Signal

presented by: Paul Healy

Updating Ambiguity Averse Preferences

presented by: Eran Hanany

Expected Utility Theory from a Frequentist Perspective

presented by: Tai-Wei Hu

ROOMMATE AND MARRIAGE MODELS G05

Pareto-Stability Concept: A Natural Solution Concept for the Roommate and the Marriage Models

presented by: Marilda Sotomayor

The Roommates Problem Revisited

presented by: Thayer Morrill

LEARNING AND GROUPS - G43

Aggregate Uncertainty Can Lead to Herds

presented by: Ignacio Monzon

Monotone Imitation

presented by: Carlos Oyarzun

Can Good Policies be Found? Repeated Elections, Learning and Policy Dynamics

presented by: Steve Callander

CONSENSUS AND AGREEMENT - 160

Agreeing to disagree: The non-probabilistic case

presented by: Dov Samet

Qualitative multiple outcomes games with consensus

presented by: Sébastien Konieczny

Knowing who speaks when: A note on communication, common knowledge and consensus

presented by: Elias Tsakas

AWARENESS II - 101

Unawareness and Strategic Announcements in Games with Uncertainty

presented by: Erkut Ozbay

Unawareness, Beliefs, Games and Speculation

presented by: Burkhard Schipper

Incentives for Unaware Agents

presented by: Xiaojian Zhao

BELIEFS AND INCOMPLETE INFORMATION - 2245

Optimism and Pessimism: Subjective Beliefs in Incomplete Information Games

presented by: Alex Possajennikov

On the Strategic Impact of an Event under Non-Common Priors

presented by: Daisuke Oyama

Evaluating information in zero-sum games with incomplete information on both sides

presented by: Dinah Rosenberg

BARGAINING AND APPLICATIONS - 276

Bargaining Outcomes of Patent Licensing in a Cournot Oligopoly Market

presented by: Shin Kishimoto

WPO, COV and IIA bargaining solutions for non-convex bargaining problems

presented by: Dries Vermeulen

Axiomatic Bargaining on Economic Environments with Lotteries

presented by: Geoffroy de Clippel

IMPLEMENTATION II - G44

Fixed Points of Choice-Improving Correspondences on the Space of Direct Mechanisms and Implementability

presented by: Fernando Tohme

Implementing Cooperative Solution Concepts: A Generalized Bidding Approach

presented by: David Wettstein

Implementation, dominance and non-bossyness

presented by: Bernardo Moreno

LOBBYING - 1246

Trading for the Future: Signalling in Permit Markets

presented by: Bard Harstad

Informational Lobbying and Competition for Access

presented by: Christopher Cotton

Polarization and the Power of Lobbyists

presented by: John Hatfield

FAIR DIVISION - G42

Cutting a Pie is Not a Piece of Cake

presented by: Walter Stromquist

Divide and Conquer: A Proportional, Minimal-Envy Cake-Cutting Procedure

presented by: Steven Brams

Cooperative games in fair division

presented by: Marco Dall'Aglio

DYNAMICS, OBJECTIVE FUNCTIONS, AND GAMES - G36

The Logit-Response Dynamics

presented by: Carlos Alos-Ferrer

Using Game Theory for Distributed Control Engineering

presented by: Anders Rantzer

Regret Minimization and the Price of Total Anarchy

presented by: Aaron Roth

LARGE GAMES I - G03

On equilibrium in pure strategies in games with many players

presented by: Edward Cartwright

Large games and the law of large numbers

presented by: Nabil Al-Najjar

Partial Exposure in Large Games

presented by: Ronen Gradwohl

NETWORKS IV - G42

Heterogeneity and Link Imperfections in Nash Networks

presented by: Christophe Bravard

Strategic Communication Networks

presented by: Frederic Koessler

Complementarities, Group Formation and Preferences for Similarity

presented by: Marcin Peski

BOUNDED COMPLEXITY- G43

Playing off-line games with bounded rationality

presented by: Marco Scarsini

Should I remember more than you? - On the best response to bounded recall strategies

presented by: Rene Levinisky

WAR - G45

After the War: An experimental study of post-conflict behavior

presented by: Ernesto Reuben

Peace Agreements Without Commitment

presented by: Carmen Beviá

A Dynamic Theory of War Initiation and Termination

presented by: Yoji Sekiya

POLITICAL COMPETITION AND DYNAMICS G05

Existence and uniqueness of Nash equilibrium in electoral competition games: The hybrid case

presented by: Alejandro Saporiti

On the General Existence of Party-Unanimity Nash Equilibria in Multi-dimensional Political Competition Games

presented by: Naoki Yoshihara

Fiscal Policy over the Real Business Cycle: A Positive Theory

presented by: Marco Battaglini

EXPERIMENTS AND METHODS - G44

Exact Hypothesis Tests for Experimental Game Theory

presented by: Karl Schlag

Truth, trust, and sanctions: On institutional selection in sender-receiver games

presented by: Ronald Peeters

Predicting the Outcome of a Game

presented by: David Wolpert

MECHANISM DESIGN VI - G36

Mechanism Design in Highly Anonymous Environments

presented by: Vincent Conitzer

A mechanism for solving bargaining problems using risk aversion

presented by: Emily Tanimura

STRATEGY-PROOFNESS - 160

Efficiency, Fairness, and Strategy-proofness in Queueing Problems: Characterizations and Impossibility

presented by: Cagatay Kayi

Strategy-proofness and Equal-cost Sharing for Excludable Public Goods

presented by: Antonio Nicolo

Exchanging objects under trade restrictions

presented by: Jorge Garcia Ramirez

INCENTIVES -G27

Strategic Asset Allocation With Relative Performance Concerns

presented by: Dmitry Makarov

We Can't Argue Forever - But We Should Do So As Long As Possible

presented by: Moritz Meyer-ter-Vehn

Ratings as Incentives

presented by: Dan Simundza

LEARNING, COMMUNICATION, COORDINATION - G40

Communication with Unobservable Constraints

presented by: Ilya Khayutin

Strategic Information Transmission through the Media

presented by: Hanjoon Jung

Social Learning in Two-Armed Bandit Problems

presented by: Braz Camargo

ALGORITHMS AND GAMES - 1246

Game-theory-based approaches to full-scale Heads-Up Texas Hold'em poker:

Automated abstraction and scalable equilibrium-finding algorithms

presented by: Tuomas Sandholm

Knowledge and Structure in Social Algorithms

presented by: Rohit Parikh

Congestion, Coordination and Matching

presented by: Hannu Salonen

STRATEGIC COMMUNICATION III - 101

Strategic Argumentation

presented by: Wioletta Dziuda

Incomplete Language as an Incentive Device

presented by: Peter Eso

Disagreement and Evidence Production in Pure Communication Games

presented by: Adam Galambos

LARGE GAMES II - G03

Thinking Categorically About Others: A Conjectural Equilibrium Approach

presented by: Yaron Azrieli

On the Existence of Pure Strategy Equilibria in Large Games

presented by: Guilherme Carmona

Robustness in Large Non-Anonymous Games

presented by: Joyee Deb

RATIONALIZABILITY- 276

Rationalizability in Games with a Continuum of Players

presented by: Pedro Jara-Moroni

Bayesian Coalitional Rationalizability

presented by: Xiao Luo

Common p-belief and Knightian uncertainty

presented by: Jayant Ganguli

AMBIGUITY AND RISK - G40

- Ambiguity, Dynamic Consistency and Behavioral Phenomena**
presented by: Peter Klibanoff
- Buying and selling price for a lottery and operational measure of riskiness**
presented by: Michal Lewandowski
- Vector Expected Utility and Attitudes toward Variation**
presented by: Marciano Siniscalchi
- The induced capacity and Choquet integral monotone convergence**
presented by: Roei Teper

LEGISLATIVE BARGAINING- 160

- Efficient and stable majority rules for one-dimensional collective choices**
presented by: Clara Ponsati
- Demand bargaining and proportional payoffs in legislatures**
presented by: Maria Montero
- Proposals vs. Demands in Coalitional Bargaining: A Comparison**
presented by: Yves Breitmoser

NETWORKS I: LEARNING - G42

- Bayesian Learning in Networks**
presented by: Ilan Lobel
- Rule of Thumb Learning in Networks**
presented by: Asu Ozdaglar
- Naive Learning in Social Networks: Convergence, Influence, and the Wisdom of Crowds**
presented by: Benjamin Golub
- Social Networks With(out) Influential Agents**
presented by: Lara Dolecek

AGENCY - G43

- Distributed Dynamic Reinforcement of Efficient Outcomes in Multi-agent Coordination**
presented by: Georgios Chasparis
- On Correlation and Competition under Moral Hazard**
presented by: Pierre Fleckinger
- News from the Informed Principal in Private-Value Environments**
presented by: Thomas Troger
- Contracts with Endogenous Information**
presented by: Dezso Szalay

UNCERTAINTY, DECISIONS, AND GAMES - 1246

- Knightian Games and Robustness to Ambiguity**
presented by: Ronald Stauber
- Ranking Completely Uncertain Decisions by the Uniform Expected Utility Criterion**
presented by: Nicolas Gravel
- When are Signals Complements or Substitutes?**
presented by: Tilman Borgers
- Iterated Regret Minimization: Towards More Realistic Solution Concepts**
presented by: Rafael Pass

GAME EXPERIMENTS I - G44

- Coordination in the Presence of Asset Markets**
presented by: Anthony Kwasnica
- Network Structure in a Link-formation Game: An Experimental Study**
presented by: Alexander Elbittar
- Neural correlates of strategic thinking in the medial prefrontal cortex**
presented by: Rosemarie Nagel

AUCTION AND MARKET EXPERIMENTS - G03

- Uniform vs. Discriminatory Auctions with Variable Supply: Experimental Evidence**
presented by: Damian Damianov
- A pure variation of risk in first-price auctions**
presented by: J. Philipp Reiss
- The Consequences of Competition for Contract Choice and Conduct: Experimental Evidence**
presented by: Abdolkarim Sadrieh
- Selection in Markets for Risky and Ambiguous Prospects**
presented by: Martin Kocher

MECHANISM DESIGN AND MARKETS -G05

- Information-based trade**
presented by: Philip Bond
- A Strategic Model for Information Markets**
presented by: Evdokia Nikolova

LARGE GAMES III - 2245

- A large market game with private information on both sides**
presented by: Enrico Minelli
- Informational Overhead of Incentive Compatibility**
presented by: Michael Schapira
- Behavioral properties of correlated equilibrium in games with many players**
presented by: Myrna Wooders

INVESTMENT AND RESEARCH - 101

- Excess Returns of Companies with a Distinguished Player**
presented by: Matthias Blonski
- In or Out: University Research and Consulting**
presented by: Richard Jensen
- The Economics of Investment in Clinical Trials**
presented by: Matthias Dahm
- Do firms interact strategically?: A structural model of the multi-stage investment timing game in offshore petroleum production**
presented by: C.-Y. Cynthia Lin

APPLICATIONS AND MATCHING THEORY- 276

- Codes of Best Practice in Competitive Markets**
presented by: David Perez-Castrillo
- Satiation and Inequality in Quasi-Competitive Markets**
presented by: Stefan Napel
- The Blocking Lemma for a Many-to-one Matching Model**
presented by: Jorge Oviedo

MECHANISM DESIGN VIII - G27

- Optimal Combinatorial Mechanism Design with Interdependent Values**
presented by: Levent Ulku
- R&D Project Selection - a Mechanism Design Approach**
presented by: Talia Bar
- An Efficient Auction for Non Concave Valuations**
presented by: Eyal Beigman
- Beyond the Revelation Principle: Manipulation-Optimal Mechanisms**
presented by: Abraham Othman

ALLOCATION RULES - G36

- Repeated allocation schemes for dynamic cost games: newsvendor inventory centralization with non-independent demands**
presented by: Ana Meca
- Bi-monotonic allocation rules for multi-choice clan games**
presented by: Rodica Branzei
- Minimizing expected delay in a PERT network**
presented by: Leticia Lorenzo
- A note on finding the Nucleolus of an n-Person cooperative game by a single linear program**
presented by: Justo Puerto

INFORMATION AND ADVERSE SELECTION - G45

- A Method to Solve a Class of Two-Dimensional Screening Problems**
presented by: Sergei Severinov
- Finding Neutral Optima in Informed Principal Problems with Common Values**
presented by: Dieter Balkenborg
- Informed Auctioneer Problem**
presented by: Filippo Balestrieri
- Monotonicity and Implementability**
presented by: Dov Monderer

IO AND MARKETS - G45

Herding and Bank Runs

presented by: Chao Gu

Strikes as the 'Tip of the Iceberg' in a Theory of Firm-Union Cooperation

presented by: Robert Gary-Bobo

Efficiency and the Final Consumer in Resale Markets with Externalities

presented by: Omer Biran

Patience, Fish Wars, rarity value & Allee effects

presented by: Reinoud Joosten

DYNAMICS, LEARNING AND MEMORY- G40

The Logit-Response Dynamics: Challenging Asynchrony and "Completeness"

presented by: Jason Marden

Learning Games

presented by: Nobuyuki Hanaki

Efficient Dynamic Coordination with Individual Learning

presented by: Colin Stewart

Limited Memory, Categorization and Competition

presented by: Amit Pazgal

AWARENESS I - G36

Dynamic Unawareness and Rationalizable Behavior

presented by: Aviad Heifetz

A Characterization of Trivial Unawareness

presented by: José Montiel

Unawareness and the Standard State Space Revisited

presented by: Siyang Xiong

Player-Set Uncertainty

presented by: Harborne Stuart, Jr.

NETWORKS II: FORMATION - G27

Contractually Stable Networks

presented by: Ana Mauleon

A Strategic Theory of Network Status

presented by: Brian Rogers

Limited Connections: Economic Foundations for a Preferential Attachment Model

presented by: Ana Babus

Congestion Games with Malicious Players

presented by: Moshe Babaioff

AUCTIONS - G03

Asymmetric First-Price Auctions With Uniform Distributions:

Analytic Solutions to the General Case

presented by: Ronald Stauber

All-Pay Contests

presented by: Ron Siegel

Information Aggregation in Double Auctions

presented by: Eiichiro Kazumori

REPEATED GAMES - 101

Heterogeneous Beliefs and Local Information in Stochastic Fictitious Play

presented by: Drew Fudenberg

Cooperation in the Repeated Prisoner's Dilemma Game with Local Interaction and Local Communication

presented by: Myeonghwan Cho

Perceptron versus Automaton

presented by: Sylvain Beal

Repeated Anonymous Random Matching Games: Community Enforcement

presented by: Julio Gonzalez-Diaz

DISCRETE MATCHING MODELS - G43

Substitutes and Stability for Matching with Contracts

presented by: Fuhito Kojima

Benefits of Matchmaking in Two-sided Matching Markets

presented by: Hanna Halaburda

Dating and updating

presented by: Paula Jaramillo

Coalitional matchings

presented by: Emiliya Lazarova

MECHANISM DESIGN IV -G05

Secret Contracts for Efficient Partnerships

presented by: David Rahman

Optimal Separate Accounting vs. Optimal Formula Apportionment

presented by: Thomas Gresik

Contracts for experts with opposing interests

presented by: Andriy Zapechelnyuk

Coordination, Implementation and Two-Sided Cheap-Talk

presented by: Indrajit Ray

GAME THEORY - 2245

Trees and Extensive Forms

presented by: Klaus Ritzberger

Interdependent Preferences, Potential Games And Household Consumption

presented by: Rahul Deb

You won't harm me if you fool me

presented by: Federico Echenique

Learning and Falsifiability in Testing Experts

presented by: Jonathan Weinstein

GAME EXPERIMENTS II - G44

When Herding and Contrarianism foster Market Efficiency: A Financial Trading Experiment

presented by: Daniel Sgroi

Equilibrium Play and Best Response to (Stated) Beliefs in Normal Form Games

presented by: Pedro Rey-Biel

Actions and Beliefs in a Social Preferences Experiment: What do Selfish and Social Welfare Maximizers Believe Others do?

presented by: Nagore Iriberry

Strategic Sophistication Category: Response Time, Eye Movements and Prediction

presented by: Ai Takeuchi

VOTING WITH INCOMPLETE INFORMATION- 1246

Strategic Voting in Sequential Committees

presented by: Matias Iaryczower

Optimality and equilibrium for binary decision problems in a committee

presented by: Jorgen Weibull

Strategic Voting over Strategic Proposals

presented by: Hulya Eraslan

Preference Monotonicity and Information Aggregation in Elections

presented by: Sourav Bhattacharya

STRATEGIC COMMUNICATION I - 160

Normal Talk

presented by: Andreas Blume

Stochastic Mechanisms in Settings without Monetary Transfers: The Regular Case

presented by: Eugen Kovac

Opinions as Incentives

presented by: Navin Kartik

Indifferent Public, Passionate Advocates, and Strategic Media

presented by: Tymofiy Mylovanov

STRATEGY-PROOFNESS - 276

Decisiveness, Manipulability, and the Spatial Median

presented by: William Zwicker

Unequivocal majority and Maskin monotonicity

presented by: Pablo Amoros

A domain condition for the equivalence of strategy-proofness and coalitionally strategy-proofness

presented by: Dolors Berga

Coalitionally Strategy-Proof Social Choice Correspondences and the Pareto Rule

presented by: Masashi Umezawa

COALITIONAL GAMES, MONOTONICITY, AND SOCIAL WELFARE - G42

Population solidarity, population fair-ranking, and the egalitarian solution

presented by: Youngsub Chun

Monotonicity of social welfare optima

presented by: Lars Peter Østerdal

Aggregate-monotonic stable solutions.

presented by: Pedro Calleja

The cooperative endorsement of correlation

presented by: Penelope Hernandez

THE DYNAMICS OF INFORMATION - 276

Optimal Dynamic Contests

presented by: Lones Smith

Delay in Strategic Information Aggregation

presented by: Ettore Damiano

Information acquisition and reputation dynamics

presented by: Qingmin Liu

The Durable Information Monopolist

presented by: Axel Anderson

THEORETICAL INDUSTRIAL ORGANIZATION- 1246

Markets for Information: of Inefficient Firewalls and Efficient Monopolies

presented by: Piero Gottardi

The Sorting Effect of Price Competition

presented by: Jan Eeckhout

Strategic Capacity Choice under Uncertainty: The Impact of Market Structure on Investment and Welfare

presented by: Veronika Grimm

On Compatibility in Two-sided Market

presented by: Ekaterina Goldfayn

AUCTION EXPERIMENTS- G03

Seller Competition and Listing Attributes in Internet Auctions

presented by: Rafael Tenorio

Reservation Values in Laboratory Auctions: Context and Bidding Behavior

presented by: Theodore Turocy

Uniform-Price Auctions without Exogenous Uncertainty: An Experimental Study

presented by: Andrei Gomberg

English Auctions with Resale: An Experimental Study

presented by: Sotirios Georganas

CULTURE, PERSONA, AND SELF-SORTING IN EQUILIBRIA - 2245

Unscheduled Appointments

presented by: Alan Miller

Persona Games

presented by: Julian Jamison

Cultural Transmission and the Evolution of Trust and Reciprocity

presented by: Gonzalo Olcina

MECHANISM DESIGN II - G27

A theory of expressiveness in mechanisms

presented by: Michael Benisch

Publicly Achieving Privacy and Trust In Mediated Normal-Form Mechanisms

presented by: Sergei Izmalkov

Posted prices vs. negotiations: an asymptotic analysis

presented by: Liad Blumrosen

Characterizing Mechanism Design Over Discrete Domains

presented by: Ahuva Mu'alem

DYNAMIC AND STOCHASTIC GAMES II-- G43

Solving Dynamic Games with Newton's Method

presented by: Karl Schmedders

Multiple Equilibria in Empirical Pricing Games

presented by: Che-Lin Su

Approximations for Markov Perfect Industry Dynamics

presented by: Gabriel Weintraub

Computing Equilibrium Value Sets for Dynamic Games with State Variables

presented by: Sevin Yeltekin

POWER AND PUBLIC GOODS - G45

Fair allocation as policy handle to discourage free riding

presented by: Kim Hang Pham Do

Probability of conflicts for an unstable effectivity function

presented by: Ramzi Bennour

Correlated Equilibrium and the Pricing of Public Goods

presented by: Joon Song

REPEATED GAME EXPERIMENTS - 101

The Evolution of Cooperation in Infinitely Repeated Games: Experimental Evidence

presented by: Guillaume Fréchette

Is Reputation Good or Bad? An Experiment

presented by: Brit Grosskopf

Cooperation in Infinitely Repeated Games: Extending Theory and Experimental Evidence

presented by: Giancarlo Spagnolo

Reward Beats Punishment: Reward Beats Punishment: Indirect reciprocity and the role of second order information

presented by: Arno Riedl

MARKETS AND COMPETITION - G40

Contests in the Venture Capital Industry

presented by: Arieh Gavious

On Information Acquisition, Noise Trading, and Speculation

presented by: Tri Vi Dang

Bargaining with Many Players: A Limit Result

presented by: Hannu Vartiainen

COALITIONAL GAMES- G42

An axiomatization of the strong constrained egalitarian solution

presented by: Cori Vilella

The extension of Dutta-Ray's solution to convex NTU games

presented by: Elena Yanovskaya

Balanced per capita contributions and levels structure of cooperation

presented by: Juan Vidal-Puga

THE BELIEF SPACE - 160

Every hierarchy of beliefs is type

presented by: Miklos Pinter

Hierarchies of Finitely Additive Beliefs and Universal Type Spaces

presented by: Martin Meier

Uniform Topology on Types and Strategic Convergence

presented by: Eduardo Faingold

The Context of the Game

presented by: Amanda Friedenberg

NETWORKS III: FORMATION- G36

Partners heterogeneity in the two-way flow model

presented by: Billand Pascal

Networks and Stability

presented by: Frank H. Page, Jr.

Existence of one-way flow Nash networks

presented by: Frank Thuijsman

Local Dynamics in Network Formation

presented by: Martijn Tennekes

LABOR MARKETS - G44

Relational Contracts with On-the-Job Search

presented by: Simon Board

Fraternalities and Labor Market Outcomes

presented by: Sergey Popov

Investment Under Adverse Selection with Multiple Decision Criteria

presented by: Kira Pronin

Transparency, Career Concerns, and Incentives for Acquiring Expertise

presented by: Heski Bar-Isaac

DELIBERATION, INFORMATION, AND VOTING-G05

Implementation and Partial Provability

presented by: Bart Lipman

Disclosure of Information and Voting

presented by: Matthew O. Jackson

The Condorcet Jury Theorem: The dependent case

presented by: Shmuel Zamir

Majoritarian Debate

presented by: Dimitri Landa

STRATEGIC COMMUNICATION IV - 276

- Language, meaning and games**
presented by: Stefano Demichelis
- Signaling with endogenous “types”**
presented by: Younghwan In
- Wait and See**
presented by: Yuk-Fai Fong
- Iteratively Stable Cheap Talk Equilibria**
presented by: Sidartha Gordon

MATCHING AND ASSIGNMENTS- G45

- Constrained School Choice: An Experimental Study**
presented by: Guillaume Haeringer
- Walrasian Equilibria of the Assignment Model**
presented by: Debasis Mishra
- Multi-sided Assignment Games: Additive Games**
presented by: Oriol Tejada

DECISION THEORY AND PREFERENCES- G40

- Simplicity and Likelihood: An Axiomatic Approach**
presented by: Itzhak Gilboa
- An Algorithm for Proper Rationalizability**
presented by: Andrés Perea
- Multiplayer belief revision and accuracy orders**
presented by: Bernard Walliser
- Generating ambiguity in the laboratory**
presented by: Jack Stecher

THEORY - 2245

- Preference for Similarity and Information Collection in Groups**
presented by: Mariagiiovanna Baccara
- Dividing and Discarding: A Procedure for Taking Decisions with Non-transferable Utility**
presented by: William Fuchs
- Learning and Complementarities: Implications for Speculative Attacks**
presented by: Emre Ozdenoren
- Decisions with Errors**
presented by: Pavlo Blavatsky

ASSIGNMENT GAME AND EXTENSIONS - G36

- Sensitivity of core allocations in assignment markets**
presented by: Tamás Solymosi
- Mixed Matching Markets**
presented by: Winfried Hochstaettler
- On the dimension of the core of the assignment game**
presented by: Carles Rafels
- The Multiple-partners Assignment Game with Heterogeneous Sells and Multi-unit Demands: Competitive Equilibria**
presented by: Alejandro Neme

COALITION STRUCTURES - G42

- The Average Tree Solution for Cooperative Games with Limited Communication Structure**
presented by: Dolf Talman
- The Shapley value for games in partition function form**
presented by: Michel Grabisch
- Values for Partition Function Form Games**
presented by: David Housman
- Graph Monotonic Values**
presented by: Gerard Hamiache

MECHANISM DESIGN III - G05

- Renegotiation-proof mechanism design**
presented by: Gregory Pavlov
- Nonlinear Pricing with Resale**
presented by: Isa Hafalir
- The Trade-off Between Fast Learning and Dynamic Efficiency**
presented by: Alex Gershkov
- Allocating scarce goods: what money can't buy**
presented by: Daniele Condorelli

SOCIAL PREFERENCES AND INSTITUTIONS I -160

- Cooperation among strangers under the shadow of the future**
presented by: Gabriele Camera
- Recommendation Behavior and Product Choice**
presented by: Miriam Mezger
- Directed Altruism and Enforced Reciprocity in Social Networks**
presented by: Tanya Rosenblat
- Group-Beneficial Behavior: An Unconventional Application of the Theory of Costly Signaling**
presented by: Sascha Mohr

VALUES OF COOPERATIVE GAMES - 1246

- Hierarchies achievable in simple games**
presented by: Josep Freixas
- A second associated consistency and axiomatization of the Shapley value for TU-games: a matrix theory approach**
presented by: Theo Driessen
- Smoothing values of non-differentiable vector measure games**
presented by: Omer Edhan
- Multilinear Extensions and Semivalues for Multichoice Games**
presented by: Michael Jones

AUCTIONS AND MECHANISM DESIGN - G03

- Auctions with Return Policies as Optimal Selling Mechanisms**
presented by: Jun Zhang
- Communication and Efficiency in Auctions**
presented by: Nenad Kos
- Sequential Procurement Auctions and Their Effect on Investment Decisions**
presented by: Nicolas Figueroa
- Simplified Mechanisms and Applications**
presented by: Paul Milgrom

INDUSTRIAL ORGANIZATION II- G44

- Optimal monitoring to implement clean technologies when pollution is random**
presented by: Ines Macho-Stadler
- Stability of Price Leadership Cartel with Endogenous Pricing**
presented by: Yoshio Kamijo
- Entrepreneurial Economies as Auctions**
presented by: Christian Roessler
- Occupational Choice and the Quality of Entrepreneurs**
presented by: Eren Inci

PUBLIC GOODS AND TAXATION- 101

- Privately Provided Public Goods in a Dynamic Economy**
presented by: Laura Marsiliani
- Regulation and Monitoring with Incomplete Contracts**
presented by: Shinji Kobayashi
- Bayesian Equilibrium in a Public Good Economy**
presented by: Shlomit Hon-Snir
- Strategic Nonlinear Income Tax Competition with Perfect Labor Mobility**
presented by: John Weymark

DYNAMIC AND STOCHASTIC GAMES I - G43

- Lumpy Capacity Investment Dynamics**
presented by: Mark A. Satterthwaite
- Finite State Dynamic Games with Asymmetric Information: A Framework for Applied Work**
presented by: Chaim Fershtman
- A User's Guide to Solving Dynamic Stochastic Games Using the Homotopy Method**
presented by: Yaroslav Kryukov
- A Theory of Regular Markov Perfect Equilibria in Dynamic Stochastic Games: Genericity, Stability, and Purification**
presented by: Ulrich Doraszelski

NETWORKS IX - G27

- Robustness of networks in the threshold game - in favour of non-hierarchical, heterogeneous networks**
presented by: Kris De Jaegher
- Noncooperative Networks in Multimarket Oligopolies**
presented by: Sudipta Sarangi
- Farsightedly Stable Networks**
presented by: Vincent Vannetelbosch

DYNAMIC GAMES - 43

- Ergodic Equilibria in Monotone Stochastic Sequential Games**
presented by: Thomas Norman
- Strategically Supported Cooperation in Dynamic Games**
presented by: Nadezhda Kozlovskaya
- Existence of Nash Equilibrium in Open Loop Dynamic Games with Non-Differentiable Payoffs**
presented by: Adin Bagh
- Long-run Negotiations with Dynamic Accumulation**
presented by: Francesca Flamini

STABLE STRATEGY SETS- 160

- Strategic characterization of the index of an equilibrium**
presented by: Bernhard von Stengel
- Static Stability in Games**
presented by: Igal Milchtaich
- Refined best-response correspondence and dynamics**
presented by: Christoph Kuzmics
- Strongly rational sets for normal-form games**
presented by: Grandjean Gilles

POLITICS AND CONFLICT- G45

- How Important is the Credibility Problem in Politics: Evidence from State Level Abortion Legislation**
presented by: Eduardo Zambrano
- An Economic Analysis of the Aldo Moro's Kidnapping and Assassination**
presented by: Régis Deloche
- The Killing Game: A Theory of Non-Democratic Succession**
presented by: Konstantin Sonin
- The Art of Compromise**
presented by: Maria Gallego

STOCHASTIC GAMES - 276

- Optimal Portfolios in an Competing-Insiders Market: Anticipative Stochastic Differential Game Model**
presented by: Yajun Xiao
- On Two person stochastic games of perfect information**
presented by: Gomatam Ravindran
- Pure Strategy Markov Equilibrium In Stochastic Games with Concave Transition Probabilities**
presented by: Subir Chakrabarti
- A Theory of Regular Markov Perfect Equilibria in Dynamic Stochastic Games: Genericity, Stability, and Purification**
presented by: Juan Escobar

COST-SHARING MECHANISMS- G40

- Optimal VCG Redistribution Mechanisms**
presented by: Mingyu Guo
- A core selection procedure for airline slot exchange**
presented by: Rakesh Vohra
- Group strategyproof cost sharing: budget balance vs. budget surplus**
presented by: Ruben Juarez

SOCIAL PREFERENCES AND INSTITUTIONS II-G42

- Institutions and Behavior: Experimental Evidence on the Effects of Democracy**
presented by: Pedro Dal Bo
- Fair Price Conventions in Markets with Random Matching**
presented by: Christian Korth
- Procedural Concerns in Psychological Games**
presented by: Alexander Sebald

NETWORKS V: COMMUNICATION AND BELIEFS- G27

- Extensive communication and the madness of crowds**
presented by: Maria Saez-Marti
- Beliefs in Network Games**
presented by: Willemien Kets
- Communication networks in the multi-player electronic mail game**
presented by: Stephanie Rosenkranz
- Strategic Information Extraction Through Networks**
presented by: Antonio Jimenez-Martinez

INDUSTRIAL ORGANIZATION -G44

- A Joint Project with Incomplete Information**
presented by: Eiichi Miyagawa
- Moral-Hazard and Coinsurance Arrangements within Groups**
presented by: Osnat Yaniv
- Rushes**
presented by: Andreas Park

STRATEGIC COMMUNICATION II - 1246

- Two-Senders Are Better Than One - A Note on One-Dimensional Cheap Talk under Simultaneous Disclosure**
presented by: Wolfgang Gick
- Clearly Biased Experts**
presented by: Rick Harbaugh
- Public vs. Private Communication with a Diverse Audience**
presented by: Maria Goltsman
- Relying on non-selfserving statements: a solution to multi-sender cheap-talk games**
presented by: Sven Feldmann

BIOLOGY AND ECONOMICS - G36

- Evolution of Time Preferences and Attitudes Towards Risk**
presented by: Nick Netzer
- Grooming in an Artificially Induced Biological Market**
presented by: Eric van Damme
- Evolution, Rationality and Adaptation in a Changing Environment**
presented by: Olivier Gossner
- Evolution of preferences under perfect observability: (almost) anything is stable**
presented by: Florian Herold

MECHANISM DESIGN I- G05

- Should team workers prefer rich bosses?**
presented by: Juan D. Moreno-Ternero
- Fund-Raising and Donation Games**
presented by: Alison Watts
- On Collective Identification Procedures with Independent Qualified Certification**
presented by: Stefano Vannucci
- On the rule of k names**
presented by: Salvador Barbera

THEORY I- 2245

- Betting Markets in Basque-ball Matches**
presented by: Elena Inarra
- Evolution of social contracts in the laboratory**
presented by: Pontus Strimling
- Renegotiation-proof Agreements under Asymmetric Information**
presented by: Arijit Sen
- An extension of Reny's theorem without quasi-concavity**
presented by: Philippe Bich

DECISION PROCEDURES - G42

- Foundations of Intrinsic Habit Formation**
presented by: Kareen Rozen
- Checklists: A procedural foundation for utility maximisation**
presented by: Marco Mariotti
- Two-stage boundedly rational choice procedures: Theory and experimental evidence**
presented by: Paola Manzini
- Choice by Constraint Elimination**
presented by: Daisuke Nakajima

AUCTIONS IV - G03

- Auctions with External Incentives**
presented by: Francesco Giovannoni
- Aversion to Price Risk and the Afternoon Effect**
presented by: Claudio Mezzetti
- Charity Auctions for the Happy Few**
presented by: Olivier Bos
- First-price auctions, seller information and commitment to sell**
presented by: Frank Rosar

AUCTIONS V- G03

Learning in Unknown Games

presented by: Thomas Boehme

An Extension of Ausubel's Auction for Heterogeneous Discrete Goods

presented by: Hakan Inal

Asymmetric First Price Auctions

presented by: Rene Kirkegaard

Computing Reserve Prices in Real-World English Auctions

presented by: William Walsh

REPEATED GAMES- 1246

Bounded Memory with Finite Action Spaces

presented by: Mehmet Barlo

Belief-Based Strategies in the Repeated Prisoners' Dilemma with Asymmetric Private Monitoring

presented by: Bo Chen

Folk Theorems with Bounded Recall and (Almost) Perfect Monitoring

presented by: George Mailath

CORE AND NUCLEOLUS- G42

Extension of the Core and the Nucleolus to Games in Partition Function Form, Not Necessarily Superadditive

presented by: Roger McCain

The Core of Set Games

presented by: Hao Sun

The Maximal Payoff and Coalition Formation in Coalitional Games

presented by: Jingang Zhao

The monoclus of a coalitional game

presented by: Marco Slikker

ELECTORAL COMPETITION 1- G45

A positive theory of income taxation

presented by: John Roemer

Stable Policies in Coalition Governments

presented by: M. Socorro Puy

Personal Influence: Social Context and Political Competition

presented by: Andrea Mattozzi

DYNAMICS AND CONVEXITY- G44

On the Consistency of Optimality Principles in N-Person Extensive Games

presented by: Elina Zhukova

Nash Equilibrium Points in a Game of "Seasonal" Stopping

presented by: Isaac Sonin

A characterization of convex games by means of bargaining sets

presented by: Josep M Izquierdo

Encouraging Cooperation in Sharing Supermodular Costs

presented by: Andreas Schulz

TU COALITIONAL GAMES - 2245

The Shapley value for games with restricted cooperation

presented by: Emilio Calvo

Leximals, the Lexicore and the Average Lexicographic Value

presented by: Yukihiro Funaki

The Restricted Harsanyi Set for Games with Ordered Players

presented by: Rene van den Brink

COST SHARING - G43

Intertemporal Cost-Sharing with Durable Goods

presented by: Laurence Kranich

Additive cost sharing on a tree

presented by: Yuntong Wang

Minimum cost spanning tree problems with groups

presented by: María Gómez-Rúa

Approximate Stable Solutions in Infinite Tree Problems

presented by: Natividad Llorca

ENDOGENOUS PARTICIPATION-101

Investigating Bid Preferences at Low-Price, Sealed-Bid Auctions with Endogenous Participation

presented by: Harry Paarsch

Sequential Auctions with Random Arrivals

presented by: Maher Said

Contests with a Stochastic Number of Players

presented by: Alexander Matros

POLITICS AND INFORMATION - 276

Costly Information Acquisition. Part I: Better to Toss a Coin?

presented by: Matteo Maria Triossi Verondini

One Person, Many Votes: Divided Majority and Information Aggregation

presented by: Micael Castanheira

Sanctioning and Learning

presented by: Ethan Bueno de Mesquita

Common knowledge is power

presented by: Alexis Belianin

NETWORKS VI: GAMES - G27

Strategic substitutes and networks

presented by: Yann Bramoullé

Local Interactions on Graphs: A Pairwise Approximation Approach

presented by: Thomas Gall

Information Trading in Social Networks

presented by: Andrei Karavaev

The impact of degree of cooperation on Braess's Paradox

presented by: Elazouzi Rachid

BEHAVIORAL THEORY II- G40

Fairness and Desert in Tournaments

presented by: Rebecca Stone

A Simulation Study of Learning a Structure: Mike's Bike Commuting

presented by: Ryuichiro Ishikawa

The Strategic Value of Recall

presented by: Ron Peretz

MECHANISM DESIGN IX- G05

Characterizing Truthful Market Design

presented by: Rica Gonen

Revenue Monotonicity: New Results for Deterministic and Randomized Mechanisms

presented by: Baharak Rastegari

Reputation in Online Markets

presented by: Christina Aperjís

EQUILIBRIUM CONCEPTS - 160

Minimax regret and strategic uncertainty

presented by: Ludovic Renou

Nested Potentials and Robust Equilibria

presented by: Hiroshi Uno

Non-Atomic Potential Games and the Value of Vector Measure Game

presented by: Takashi Ui

Fall back equilibria

presented by: John Kleppe

BARGAINING I- G36

Jackpot Justice: The Value of Inefficient Litigation

presented by: Jun Zhou

The Nash Bargaining Solution in General n-Person Cooperative Games

presented by: Akira Okada

Dynamic Matching and Bargaining Games: A General Approach

presented by: Stephan Laueremann

Optimism and Bargaining Inefficiency

presented by: Duoche Li

MULTI-UNIT AUCTIONS- G05

Two bidder discriminatory auctions

presented by: Gabor Virag

Characterization of Bidding Behavior in Multi-Unit Auctions and Applications

presented by: Alvaro Riasco

Revenue and Efficiency in Uniform-Price Private Value Auctions

presented by: Michal Briesky

CONTRACTS AND TOURNAMENT THEORY- G36

Incorporating Unawareness into Contract Theory

presented by: Emel Filiz Ozbay

Efficient tournaments within teams

presented by: Paul Schweinzer

Which Inequality?

presented by: Tatiana Kornienko

Breakup of Repeat Transaction Contracts, Specific Investment, and Efficient Rent-Seeking

presented by: Bernhard Ganglmair

RESALE IN AUCTIONS- 1246

Auctions with Resale Market and Asymmetric Information

presented by: Rodrigo Harrison

Collusion via resale

presented by: Rod Garratt

Should Speculators Be Welcomed in Auctions?

presented by: Marco Pagnozzi

Existence of Monotone Pure Strategy Equilibrium in First-Price Auctions with Resale

presented by: Charles Z. Zheng

BARGAINING II- G42

Bargaining in groups

presented by: Nicolas Querouo

Unobservable information acquisition before bargaining

presented by: Sjaak Hurkens

When is Bargaining Successful? Negotiated Divisions of Tournament Prizes

presented by: Lukasz Pomorski

Regular Bargaining Games

presented by: John Duggan

POLITICS, GOVERNMENTS AND POLICIES- 2245

A Theory of Bad Governments

presented by: Georgy Egorov

Redistributive politics with distortionary taxation

presented by: Nicolas Sahuguet

Inefficient Redistribution and Inefficient Redistributive Politics

presented by: Brian Roberson

Strategic Approaches to Third Party Intervention: Theory and Application to U.S. Policy in Iraq

presented by: Nolan Miller

EVOLUTION AND LEARNING - 160

Multiplicity and sensitivity of stochastically stable equilibria in coordination games

presented by: Toshimasa Maruta

Anticipating Cycles

presented by: Michael Rapp

The Evolution of Bidding Behavior in Private-Values Auctions and Double Auctions

presented by: Rene Saran

BEHAVIORAL MODELS OF INTERTEMPORAL

CHOICE - G40

Procrastination, partial naivete, and behavioral welfare analysis

presented by: Geir Asheim

Learning Self-Control

presented by: Syed Ali

Credit Card Competition and Naive Hyperbolic Consumers

presented by: Elif Incekara Hafalir

COOPERATIVE THEORY AND APPLICATIONS-G44

Fixed-route travelling salesman games and the shapley value

presented by: Duygu Yengin

Measuring influence in command games

presented by: Agnieszka Rusinowska

A Coalitional Theory of Oligopoly

presented by: Nir Dagan

On the Geometry of Cooperative Behavior

presented by: Virginie Masson

IMPLEMENTATION I - 276

Robust Virtual Implementation with Incomplete Information: Towards a Reinterpretation of the Wilson Doctrine

presented by: Roberto Serrano

Continuous Implementation

presented by: Olivier Tercieux

Efficient Repeated Implementation with Complete Information

presented by: Jihong Lee

MECHANISM DESIGN V - G03

Manna from Heaven or Forty Years in the Desert: Optimal Allocation without Transfer Payments

presented by: Surajeet Chakravarty

Mechanism Design for Abstract Argumentation

presented by: Kate Larson

Budget Uncertainty and Faculty Contracts: A Dynamic Framework for Comparative Analysis

presented by: Irina Khovanskaya

NETWORKS VII: BARGAINING AND ALLOCATIONS- G40

Bargaining on Networks

presented by: Mihai Manea

A Sensitive Flexible-network Approach

presented by: Noemí Navarro

Measuring Trust in Peruvian Shantytowns

presented by: Markus Mobius

Social Networks and Unraveling in Labor Markets

presented by: Itay Fainmesser

SESSION 173: COMMUNICATION AND GAMES- G43

Communication, Learning and Social Memory

presented by: Dino Gerardi

Finite-Time Communication Through Noisy Channels

presented by: Amparo Urbano

Credibility and Determinism in a Game of Persuasion

presented by: Itai Sher

A Minority-Proof Cheap-Talk Protocol

presented by: Yuval Heller

ELECTORAL COMPETITION 2 - G45

Rational Expectations and Media Slant

presented by: Cesar Martinelli

Campaign Promises and Political Factions

presented by: Elena Panova

Reputation, Negative Campaigning, and Political Shirking

presented by: Deborah Fletcher

Corporate Control and Multiple Large Shareholders

presented by: Amrita Dhillon

EQUILIBRIUM COMPUTATION - 101

Gradient-based algorithms for Nash equilibrium finding in huge sequential two-person zero-sum imperfect-information games

presented by: Andrew Gilpin

Computational Properties of Quasi-Strict Equilibrium

presented by: Felix Brandt

Convergent Adaptive Discretization Methods for Computing Correlated Equilibria of Polynomial Games

presented by: Noah Stein

Action-Graph Games

presented by: Albert Xin Jiang

COMMON VALUE AUCTIONS- G43

Information Aggregation in Common Value Asset Markets and the Efficient Markets Hypothesis

presented by: Ricardo Serrano-Padial

Common-Value Auctions with Two Bidders: When To Brag About What You Know

presented by: Daniel Quint

Asymmetric Common-Value Auctions with Applications to Auctions with Resale

presented by: Harrison Cheng

Information Concentration in Common Value Environments

presented by: Mikhael Shor

IMPLEMENTATION - 2245

Imminent Nash Implementation

presented by: Georgy Artemov

Characterizing Natural Implementability when Social Choice Correspondences are Efficient

presented by: Takeshi Suzuki

Let them cheat!

presented by: Rodrigo Velez

COLLEGE ADMISSIONS APPROACHES- G42

College Admissions Game: Early Action or Early Decision?

presented by: Ayse Mumcu

Matching Markets under (In)complete Information

presented by: Jordi Massó

Two-sided matching with interdependent values

presented by: Archishman Chakraborty

EXISTENCE OF EQUILIBRIUM- G44

Existence of Equilibrium in Common Agency Games with Adverse Selection

presented by: José Fajardo

Existence of Equilibrium in Qualitative and Discontinuous Games

presented by: Paulo Barelli

Partial Cooperation in Symmetric Games

presented by: Subhadip Chakrabarti

GROUP FORMATION AND BARGAINING- 561

One-dimensional Bargaining with Markov Recognition Probabilities

presented by: P. Jean-Jacques Herings

A strategic model of club formation; existence and characterization

presented by: Marta Faias

Favoritism

presented by: Miguel Duran

Competition of matching intermediaries with non-dichotomous preferences

presented by: Filomena Garcia

GAMES AND COMPUTING - 160

Guaranteed Revenue In Combinatorial Auctions

presented by: Silvio Micali

A sufficient condition for rules to be frequently manipulable for any number of alternatives

presented by: Lirong Xia

Using Empirical Methods to Compare Multiagent Learning Algorithms

presented by: Erik Zawadzki

NETWORKS VIII - G05

Two-Stage Myopic Dynamics in Network Formation Games

presented by: Esteban Arcaute

How to connect under incomplete information

presented by: Dinko Dimitrov

Efficiency Bounds for Sequential Wireless Resource Allocation Auctions

presented by: Randall Berry

Repeated Games Played in a Network

presented by: Markus Kinaterer

RESOURCE ALLOCATION AND MECHANISMS-G03

Voting with Money

presented by: James Schummer

Mechanism Design and Money Burning

presented by: Jason Hartline

Using graphs to verify revenue equivalence

presented by: Rudolf Mueller

Axiomatic analysis of simple claims problems

presented by: William Thomson

FAIR DIVISION AND CLAIMS - 101

The two-stage rules for multi-issue allocation situations

presented by: Silvia Freire

The division problem with participant's constraints

presented by: Gustavo Bergantinos

Potential and consistency on augmenting structures

presented by: Encarnación Algaba

COLLECTIVE CHOICE - G36

How Democracy Resolves Conflict in Difficult Games

presented by: Marc Kilgour

Electing and ranking by majority judgement: 1. Experimental evidence

presented by: Michel Balinski

Electing and ranking by majority judgement: 2. Theoretical evidence

presented by: Rida Laraki

A Theoretical Framework of Farsightedness in Sequential Committee Games

presented by: Roland Pongou

EXPERIMENTAL AND BEHAVIORAL MODELS- G45

Field and Lab Convergence in Poisson LUPI Games

presented by: Joseph Wang

Looking for strategic voting in the one-dimension setting : An experimental study

presented by: Jean-Francois Laslier

Quantum Game Theory and Cooperation

presented by: Matthias Hanauske

GERRYMANDERING AND IMMIGRATION- 276

Can democracy always lead to efficient economic transitions?

presented by: Tapas Kundu

Optimal Gerrymandering and Policy Choice: a Welfare Analysis

presented by: Emanuele Bracco

Strategicproofness, Cross-border Externalities and the Cost of Centralization

presented by: Antoine Loeper

Political Equilibrium Social Security with Migration

presented by: Thomas Renstrom

BARGAINING III - G27

Stationary Equilibria in Bargaining with Externalities

presented by: Andreas Westermark

The impact of bargaining on markets with price takers

presented by: David Gill

Information Revelation and Acquisition in Bargaining

presented by: Stephanie Lau

A theory of disagreement in repeated games with renegotiation

presented by: David Miller

BEHAVIORAL GAME THEORY AND EXPERIMENTS- G40

Competition on Common Value Markets With Naive Traders

presented by: Nadine Chlass

The Neural Correlates of Deception, Suspicion, and Strategic Thought During Bargaining

presented by: Meghana Bhatt

Contrasting Reference-Dependent Choice Models

presented by: Yusufcan Masatlioglu

Decision Making with Many Options

presented by: Tibor Besedes

INCOMPLETE INFORMATION- G45

The value of Repeated Games with an informed controller
presented by: Jérôme Renault

The Dynamics of the Bayes-Nash Equilibrium
presented by: Larissa Batrancea

BELIEFS AND BEHAVIOR - G36

Learning and Risk Aversion
presented by: Rajiv Sarin

State Space Dimensions and Belief Updating
presented by: Ricard Torres

Increasing strategic uncertainty in a two-period Stackelberg-type game
presented by: Irenaeus Wolff

GLOBAL GAMES- G44

Endogenous information and credibility of beliefs in a global coordination game of regime switch
presented by: Andrea Finicelli

Contagion in Games with Strategic Complementarities
presented by: Marion Oury

Central Bank Transparency, Inflation Targeting and Credibility
presented by: Rafael Santos

BARGAINING- G27

Multilateral Bargaining over Coalitional Externalities
presented by: Yuan Ju

Bargaining with Non-Convexity and Variable Threats
presented by: Cheng-Zhong Qin

Some Have a Talent for Bargaining and Some Don't
presented by: Ella Segev

AUCTIONS AND MARKETS- 160

Characterization of Pure Strategy Equilibria in Uniform Price IPO Auctions
presented by: Ping Zhang

A method for dealing with dependence in auctions
presented by: Luciano de Castro

Effectively Setting Non-Anonymity in Financial Markets with Price Leadership
presented by: Luca Gelsomini

LEARNING - G43

Bayesian Learning with Bounded Rationality: Convergence to Nash Equilibrium

presented by: Yuichi Noguchi

Learning in a local interaction hawk-dove game: Do not learn as your neighbors do
presented by: Jurjen Kamphorst

IMPERFECT MONITORING - G03

Eventual perfect monitoring
presented by: Eran Shmaya

Correlation and authentication in repeated games with network monitoring
presented by: Tristan Tomala

Communication Games with Asymmetric Information
presented by: Alon Shapira

POPULATION DYNAMICS - 276

Logit Evolution in Potential Games: Reversibility, Rates of Convergence, Large Deviations, and Equilibrium Selection

presented by: William Sandholm

Learning in Games with Strategic Complementarities Revisited

presented by: Ulrich Berger

Stochastic Replicator Dynamics and Traveling Waves in Coordination Games
presented by: Stuart McDonald

FAIRNESS AND ALLOCATIONS - G42

Reference Points, Perceived Procedures, and Fairness
presented by: Dorothea Herreiner

Equity Basis Selection in Allocation Environments
presented by: Van Kolpin

Money metric utilitarianism without utilities or prices
presented by: Christopher Chambers

SEGREGATION - 101

Schelling Redux: An Evolutionary Dynamic Model of Residential Segregation
presented by: Emin Dokumaci

A Social Network Analysis of Occupational Segregation
presented by: Marco van der Leij

Tipping and Residential Segregation: A Unified Schelling Model
presented by: Junfu Zhang

INCENTIVES II- G40

Lesser-Included Offenses
presented by: Ram Orzach

Efficient Committed Budget for Implementing Target Audit Probability for Many Inspectees
presented by: Andrew Yim

IMITATION AND ADJUSTMENT- 1246

Imitating Cooperation and the Formation of long-term Relationships
presented by: Heiner Schumacher

Imitation, Local Interaction, and Coordination: Part I
presented by: Hsiao-Chi Chen

Testing the TASP: an Experimental Investigation of Learning in Games with Unstable Equilibria
presented by: Ed Hopkins

Poster Session: Tuesday 1:45 PM - 3:00 PM room 102

How Can Form a Common Understanding of Price in G-Process
Presented by: YI Gan, Southwest University

Intertemporal Tradeoffs in Coordination Problems
Presented by: Jakub Steiner, The University of Edinburgh

Market research and complementary advertising under asymmetric information
Presented by: Toshihiro Tsuchihashi, Hitotsubashi university (grad student)

A New Concept of Solution for Fuzzy Matrix Games
Presented by: Moussa Larbani, IIUM University

Competition with Asymmetric Switching Costs
Presented by: Sebastian Infante Bilbao, Universidad de Chile

Algorithms for Multiplayer Stochastic Games of Imperfect Information with Application to Three-Player No-Limit Texas Hold'em Tournaments
Presented by: Sam Ganzfried, Carnegie Mellon University

A Notion of Non-Cooperative Game Composition and Its Incentives
Presented by: Yong Xie, Oxford University

Interactive Partially Observable Markov Decision Processes
Presented by: Piotr Gmytrasiewicz, University of Illinois at Chicago

Strategic Betting for Competitive Agents
Presented by: Liad Wagman, Duke University

A Dynamic Procurement Auction with Persistent Backlog and Capacity Constraints
Presented by: Viplav Saini, Johns Hopkins University

Pigouvian pricing and learning: A simple result in traffic network games
Presented by: Emerson Melo, Banco Central

Water filling games in wireless networks
Presented by: Andrey Garnae, St Petersburg State University

Loss-Avoidance and Frames
Presented by: Andre Lunardelli, Federal University of Goias

Boundedly rational reputation building in social dilemmas
Presented by: Sigrid Suetens, Tilburg University

A Game Theoretical Analysis of International Negotiations from the Perspective of Multi-Active Bargainers
Presented by: Ursula Ott, Loughborough University

Co-opetition in an order book with strategic heterogeneous traders and uncertainty about information asymmetries.
Presented by: Philippe GIVRY, GSCM - Montpellier Sup de Co Group

Machine Learning of Evaluation (with Applications to Computer Chess)
Presented by: Amir Ban, Hebrew University

Agreeing to disagree in a countable space of states of nature
Presented by: Joao Correia-da-Silva, Faculty of Economics. University of Port

Auctions with a Buy Price: The Case of Reference-Dependent Preferences
Presented by: Nicholas Shunda, University of Connecticut

Efficient Auctions with Private Participation Costs
Presented by: Jingfeng Lu, National University of Singapore

A bargaining approach to negotiated agreements between public regulator and firms
Presented by: Manuel Cabugueira, Lusófona University

Sequential Coalition Formation Games With a Network Constraint
Presented by: Katharine Anderson, University of Michigan

The Pronouncements of Paranoid Politicians
Presented by: Guido Cataife, Washington University in St. Louis

Lottery Voting: May Majorities Prefer to Take a Chance?
Presented by: Marco Faravelli, University of St Andrews

Enfranchisement from a Political Perspective
Presented by: Soumyanetra Munshi, Rutgers University

Public and Private Financing of Electoral Campaigns: The social welfare effect of political participation
Presented by: Mauricio Bugarin, IbmeC Sao Paulo

"Optimal Copyright Protection: Civil law vs. Criminal law."
Presented by: Yasuhiro Arai, Hitotsubashi University

Production under Uncertainty: A Characterization of Welfare Enhancing and Optimal Price Caps
Presented by: Gregor Zoettl, University of Cologne

An evolutionary argument for inequity aversion
Presented by: Robertas Zubrickas, Stockholm School of Economics

Expert Advice and Amateur Interpretations
Presented by: Ernest Lai, University of Pittsburgh

Scientific Collaboration Networks: The role of Heterogeneity and Congestion
Presented by: Antoni Rubí-Barceló, Universitat Pompeu Fabra

Games in the Eurasian gas supply network:
Presented by: Svetlana Ikonnikova, Catholic University of Leuven

Cardinal Bayesian Nontransfer Allocation Mechanisms. The Two-Object Case
Presented by: Antonio Miralles, Boston University

Natural Oligopoly in Industrial Research Collaboration
Presented by: Bastian Westbrock, Utrecht University

Strategy-proof mechanisms and uniqueness of matching in marriage markets
Presented by: Takumi Kongo, Waswda University

The Rationality of Irrationality
Presented by: Uri Weiss, The Hebrew University

Giving Advice and Perfect Equilibria in Matching Markets
Presented by: Joana Pais, ISEG

Selling Authority
Presented by: Wooyoung Lim, University of Pittsburgh

A glove-market partitioned matrix for the assignment game
Presented by: Marina Núñez, Universitat de Barcelona

A Co-evolutionary Model of Growth
Presented by: Desiree Desierto, University of the Philippines

Stable Limit Cycles, Multiple Steady States and Complex Attractors in Logit Dynamics
Presented by: Marius-Ionut Ochea, University of Amsterdam

Organization structure: equilibrium boundary, aggregation, and test statistics
Presented by: Hsih-Chia Hsieh, Hsing-Kuo University

A new kind of equilibria in dynamic games with imperfect information
Presented by: Agnieszka Wiszniewska-Matyskiel, Warsaw University

Reference Points in Generalized Second Price Auction: A Computer Simulation Experiment
Presented by: Michiharu Masui, Tokyo Institute of Technology

Multunit auctions with private information: an indivisible unit continuous price model
Presented by: Francisco Alvarez, Universidad Complutense Madrid

First-Price Sequential Auction with Pre-determined Reserve Price
Presented by: Yiqing Xing, Peking University

Stochastic Reaction Strategies, the Barro-Gordon Framework and how null-inflation can become an equilibrium
Presented by: Johannes Geissler, University of St Andrews

The Rubinstein bargaining game without an exogenous first-mover
Presented by: Fernando Branco, The Catholic University of Portugal

Dynamic Incentives and the Value of Information in Repeated Moral Hazard
Presented by: Eric Chou, National Tsing Hua University

The Theory of Collusion Under Financial Constraints
Presented by: Yosuke Yasuda, GRIPS

Farsighted Stability of the Competitive Allocations in an Exchange Economy with Indivisible Goods
Presented by: Ryo Kawasaki, Tokyo Institute of Technology

On loss aversion in a bargaining game of alternating offers
Presented by: Bram Driesen, University Maastricht

Strategic complementarities and search market equilibrium
Presented by: Michael Rauh, Indiana University

Implementing Fairness - The Design and Application of Four Bargaining Mechanisms
Presented by: James Ring, Fair Outcomes, Inc.

Information sales and strategic trading
Presented by: Francesco Sangiorgi, Collegio Carlo Alberto

Robust and non robust equilibria in a strategic market game
Presented by: Bertrand Gobillard, Univ. of Paris X & Univ. of Pennsylvania

Poster Session: Wednesday 1:45 PM - 3:00 PM room 102

Coordination Between a Sophisticated and Fictitious Player
Presented by: Bryan McCannon, Wake Forest University

On the Incentive of Strategic Information Spillover under Relative Performance Evaluation
Presented by: Young-Ro Yoon, Indiana University Bloomington

Applications of a Generalized Ky Fan's Matching Theorem in Minimax and Variational Inequality
Presented by: Hammami Hakim, CES

An experimental study of sponsored search auction: GSP vs VCG
Presented by: Emiko Fukuda, National Defense Academy of Japan

Cooperation in a sequential N-person prisoners' dilemma game: the role of information and reciprocity
Presented by: Jana Vyrastekova, Nijmegen school of management

An expected payoff symmetric solution and its application to bankruptcy problems
Presented by: Joosung Lee, Seoul National University

No Profitable Decompositions in Quasi-Linear Allocation Problems
Presented by: Camelia Bejan, Rice University

Analysis of a strategic model imposed on claims problems
Presented by: Caroline Berden, University Maastricht

Consistency of the Harsanyi Solution
Presented by: Jose Zarzuelo, Basque Country University

Sharing a polluted river network
Presented by: Baomin Dong, Univ of Int'l Business and Economics

Strong composition down. Characterizations of new and classical bankruptcy rules.
Presented by: Ricardo Martinez, University of Alicante

Risk Taking in and after Tournaments: Evidence from a Natural Experiment
Presented by: Ganna Pogrebna, Columbia University

Core Equivalence in a Mixed Economy of Arrow-Debreu Type
Presented by: Valery Vasil'ev, Russian Academy of Sciences

Cheap Talk on the Circle
Presented by: Dragan Filipovich, El Colegio de Mexico, CEE

A Dynamic Bayesian Game with Multiple Priors
Presented by: Seung Han Yoo, Cornell

Technological cooperation between countries against a terrorist threat
Presented by: Sylvain Baumann, CERENE

Bargaining, Coalitions, Signalling And Repeated Games For Economic Development And Poverty Alleviation
Presented by: Keshab Bhattarai, University of Hull

The monoculus of an airport game
Presented by: Gerwald van Gulick, Tilburg University

Coalition Formation and Distribution of Worth in TU-Games
Presented by: Roald Ramer, University of Amsterdam

Monotonicity properties for the adjudication of conflicting claims
Presented by: Yoichi Kasajima, University of Rochester

Securely implementable mechanism in a Production
Presented by: Rajnish Kumar, Rice University

Optimal Mechanisms for Scheduling Jobs on a Single Machine
Presented by: Birgit Heydenreich, Maastricht University

Sound taxation and privatization: On the use of self-declared value
Presented by: Pim Heijnen,

Leadership by Confidence in Teams
Presented by: Hajime Kobayashi, Osaka Prefecture University

Three-stage Model of Endogenous Quality Choice
Presented by: Margarita Gladkova, St. Petersburg University

A Class of Markov Decision Processes with Pure and Stationary Optimal Strategies
Presented by: Hugo Gimbert, CNRS

Modeling of Dynamic Stable Joint Venture under Uncertainty
Presented by: Nikolay Zenkevich, Saint-Petersburg University

Event Game Theory Based on Computer Games
Presented by: Xinhe Xu, Northeastern University

Equilibria in Pareto-Nash-Stackelberg Games
Presented by: Valeriu Ungureanu, State University of Moldova

Air and Rail Transport Competitive Equilibria: Are the High Speed Rail Infrastructure Costs Justifiable?
Presented by: Nicole Adler, Hebrew University of Jerusalem

Values for graph-restricted games with coalition structure
Presented by: Anna Khmel'nitskaya, SPb Institute for Economics & Mathematics RAS (Russian Academy of Sciences)

Central Bank Heterogeneity and Inflationary Pressure
Presented by: Fabia Carvalho, Banco Central do Brasil

Free-Rider and Gaming in the Distribution of Revenues Across
Presented by: eduardo andrade, Ibmecc Sao Paulo

A Multi-Stage Search Allocation Game
Presented by: Ryusuke Hohzaki, National Defense Academy

The environment protecting dynamics: an evolutionary approach
Presented by: Paloma Zapata, Facultad de Ciencias, UNAM

Mitigating Against M-Shape Society Using Game Theory and Computable General Equilibrium Models: An Case of Competition Between Food and Biofuels Markets in Taiwan
Presented by: yen-lan LIU, National Taiwan University

Deterministic, Dominant Strategy Auction Design for Agents with Costly Private Information
Presented by: David Thompson, University of British Columbia

Empirical Analysis based Game Theory Model of Central Bank Supervising Risks in China
Presented by: Hongxun Jiang, Renmin Univ. of China

The Initial Allocation of CO2 Emission Allowances: A Theoretical and Experimental Study
Presented by: Eva Benz, University of Bonn

Existence conditions for generalized kernels and bargaining sets of coalition systems
Presented by: Natalia Naumova, Saint Petersburg State University

Endogenous Market Power
Presented by: Marek Weretka, University of Wisconsin-Madison

Existence of Pure Strategy Nash equilibriums for the Two-Dimensional Three-Firms Location Problem with a Rotationally Symmetric Customer Distribution
Presented by: Kazuo Kishimoto, University of Tsukuba

Cycle and Stability of Effectivity Function
Presented by: Razafimahatolotra Dawidson, University of Paris I

Information asymmetry and checking in indefinitely repeated trust games.
Presented by: Thomas Dirkmaat, Utrecht University

Formation and Evolution of Beliefs in Public Good Games
Presented by: Jaromir Kovarik, University of Alicante

Endogenous Perturbation Equilibrium: a Possible Explanation to Some Anomalous Data about Normal Games
Presented by: Jianrong Tian, Fudan University

Emergency Department Overcrowding as a Nash Equilibrium: Hypothesis and Test by Questionnaire
Presented by: Richard Hamilton, Drexel University College of Medicine

Timing of Technology Adoption with Private Signals and Social Learning: Laboratory Experiments with Information and Network Externalities
Presented by: Glenn A. Woroch, University of California, Berkeley

Tournaments of weakly heterogeneous players
Presented by: Dmitry Ryvkin, Florida State University

Political Price Cycles in Regulated Industries: Theory and Evidence
Presented by: Rodrigo Moita, IBMEC Sao Paulo

Risk Aversion and International Environmental Agreement
Presented by: Vincent Boucher, Laval University
